

#### ICPQIQC: 29 Jan – 02 Feb 2024

### Poster Session II (01st February)

| Poster Session in (or February)              |  |       |  |  |
|--|--|-------|--|--|
| Name and                                     | Title of the Poster                                | Board |  |  |
| Affiliation                                  |  | No.   |  |  |
| Pritam Roy; S.N. Bose                        | Device-Independent Quantum Secure Direct           | 1     |  |  |
| National Centre for Basic                    | Communication Under                                |       |  |  |
| Sciences, India                              | Non-Markovian Quantum Channel                      |       |  |  |
| Priya Batra;                                 | Physics Informed Neural Network for Robust         | 2     |  |  |
| IISER Pune, India                            | Quantum Controls                                   |       |  |  |
| Rajdeep Paul;                                | Self-testing of unsharpness parameters based       | 3     |  |  |
| IIT Hyderabad, India                         | on optimal quantum violation of non-               |       |  |  |
| D : C  | contextual inequality                              | 1     |  |  |
| Rajeev Gangwar;                              | Ancilla-Assisted Protection of Information:        | 4     |  |  |
| IISER Mohali, India                          | Application to Atom-Cavity Systems                 | 5     |  |  |
| Rakesh Kumar Saini;<br>Macquarie University, | Distance from Incompleteness                       | )     |  |  |
| Australia                                    |  |       |  |  |
| Ram Krishna Patra;                           | Principle of Information Causality Rationalizes    | 6     |  |  |
| S.N. Bose National Centre for                | Quantum Composition                                | 0     |  |  |
| Basic Sciences, India                        | Quantum Composition                                |       |  |  |
| Ramadas N;                                   | Equivalence of absolutely maximally entangled      | 7     |  |  |
| IIT Madras, India                            | states and infinite quantum solutions to the       |       |  |  |
|  | problem of 36 officers of Euler                    |       |  |  |
| Ramniwas Meena;                              | Characterization of quantumness of non-            | 8     |  |  |
| IIT Jodhpur, India                           | Gaussian states under the influence of             |       |  |  |
|  | Gaussian channel                                   |       |  |  |
| Ranendu Adhikary;                            | Self-testing of true multipartite entangled states | 9     |  |  |
| Indian Statistical Institute,                |  |       |  |  |
| Kolkata, India                               | D 1 + 0 10 + 11 + 0 117 + 1                        | 1.0   |  |  |
| Ritesh Kumar Singh; IIT                      | Robust Self-testing of multiparty GHZ state        | 10    |  |  |
| Hyderabad, India Sachin Sonkar;              | through the Svetlichny's inequality                | 11    |  |  |
| IISER Mohali, India                          | Spin-based quantum Otto engines and                | 11    |  |  |
| Sagnik Ray;                                  | majorization  No Epistemic Explanation for Anti-   | 12    |  |  |
| IISER Thiruvananthapuram,                    | Distinguishability of Quantum Mixed                | 12    |  |  |
| India  | Preparations                                       |       |  |  |
| Saheli Mukherjee;                            | Interplay between the Hilbert-space dimension      | 13    |  |  |
| S.N. Bose National Centre for                | of the control system and the memory induced       |       |  |  |
| Basic Sciences, India                        | by quantum SWITCH                                  |       |  |  |
| Sahil;                                       | Uncertainty relations in pre- and post selected    | 14    |  |  |
| The Institute of Mathematical                | systems  |       |  |  |
| Sciences, India                              |  |       |  |  |
|  |  |       |  |  |
| Sahil Gopalkrishna Naik; S.N.                | Distilling Non locality in Quantum Correlations    | 15    |  |  |
| Bose National Centre for Basic               |  |       |  |  |
| Sciences, India                              |  |       |  |  |
| Samrat Sen;                                  | Advantage of Hardy's nonlocal correlation in       | 16    |  |  |
| S.N. Bose National Centre for                | reverse zero-error channel coding                  |       |  |  |
| Basic Sciences, India                        |  |       |  |  |
