

NATIONAL SCIENCE DAY 2021

Theme

Future of STI: Impacts on Education, Skills and Work

Guest Speaker

Prof. Rohini M. Godbole

Professor, Centre for High Energy Physics
Indian Institute of Science, Bangalore
2019 Padma Shri Awardee

Webinar Title

Mega projects: fundamental physics and cutting edge technology meet!

Abstract

In this talk I would like to have a conversation about a number of mega projects that exist around the world or are under planning. All these mega projects seek, quite often, to answer some very basic questions about the functioning of nature. These need (and also drive) at times the development of cutting edge technology and these in turn contribute in nontrivial ways to the society. I will discuss in detail the need of mega projects in the context of particle physics and mention some mega projects in astrophysics/astronomy as well.
